Child Nutrition Programs

Annual Statistical Report

Percent of Students Eligible for Free and Reduced Price School Meals

School Year 2011 – 2012

Introduction

Free and reduced price meal eligibility data is reported by each school food authority annually. A school food authority is a school or school district that is responsible for operating a School Lunch Program and/or a School Breakfast Program. Some schools are included in a school food authority even though they are separate school districts. The eligibility numbers and enrollment figures are for October of the current school year, as reported on the school's October Claim for Reimbursement. For the purposes of the National School Lunch Program, "eligible" means that a student has submitted an application and been certified as qualifying for free or reduced price benefits based on the Family Size and Income Guidelines published by the United States Department of Agriculture. To be eligible for free meals a family's income must be at or below 130% of the Federal poverty line. Families whose income falls between 130% and 185% of the federal poverty line qualify for reduced price meals. Eligibility determinations are made at the local level by the food service director, principal, or other person designated by the school administration.

The report for 2011-2012 uses the Child Nutrition Programs on-line reporting system. The system has calculated the information for all schools in the system, even those that do not participate in the school lunch program. If a school participates only in the Special Milk Program or only the School Breakfast Program, the report shows only zeros. There are a few public schools in Vermont that do not participate in any Child Nutrition Program and therefore are not mentioned in this report at all.

How the Report is organized:

The report is organized alphabetically by school food authority name. The schools within the school food authority are listed by building name, followed by the total for all of the schools in the school food authority (or school district.)

Column Headings

1. Building Name
2. Building Address
3. Grades included in the school lunch program. **Note:** H = Head Start; P = Preschool; U = Ungraded. These may include programs operated by the school and/or operated by another organization but located in the school and served by the lunch program.
4. Number of students approved for free meals
5. Number of students approved for reduced price meals
6. Enrollment in the school lunch program as of October. **Note:** This may be different from school enrollment because students may be included in the lunch program even though they are not enrolled in the school.
7. Percent of students enrolled in the lunch program who are eligible for free and reduced price school meals

Statewide Average: The statewide total enrollment in school lunch programs is 91,846. The total number of students eligible for free and reduced price meals is 36,935. Therefore, the statewide average eligibility is 40.21%.
